Ghazvin, Iran

Profile Summary

My passion for programming and software engineering is boundless. I specialize in creating custom web applications with Java, JavaScript, HTML, and CSS, developing Android applications with Android Studio, and crafting game applications with the Unity engine. I'm always seeking to stay up to date on the newest technologies, software design patterns, and best practices. My goal is to build applications that are not only user-friendly and aesthetically pleasing, but also robust and maintainable. Of all the programming activities I enjoy, Artificial Intelligence projects using Python are the most exciting and I am eager to use my enthusiasm and dedication to create innovative solutions and achieve excellent results.

Work Experience

Unity developer

Metarang

Ghazvin, Iran

May 2022 - Present

Tasks and Achievements

Construction of Iran's first Metaverse
